

How to knit: Step 2 - KNIT

1. After you have cast on, hold your work in your left hand

2. Keeping the yarn to the back of your work, place the tip of the right hand needle through the front of the first stitch so that it is positioned behind the left hand needle

3. Bring the yarn from behind, in an anti clockwise direction . . .

4. . . . and wrap it around the top of the right hand needle . . .

5. . . . pulling it forward, between the two needles.

6. Slip the top of right hand needle down and then up, to catch the yarn . . .

7. . . . creating a loop on your right hand needle.

8. Then release the left hand needle, either by sliding it backwards to the left or by giving it a nudge with your right hand forefinger

9. Your wool is now back to behind the right hand needle and you are ready to repeat steps 3 - 8, until you have knitted the entire row. Turn the knitting around to start again.
